

📌 Full Stack Developer – Interview Task

Project: Revamp Riyadhvi Software Technologies Website

🎯 Objectives

- Redesign and develop Riyadhvi's website with a **premium, modern look**.
 - Highlight **Web Development, App Development, UI/UX Design, and Digital Solutions** expertise.
 - Position Riyadhvi as a **solution partner** (not just a vendor).
 - Encourage lead generation through **Consultation Booking, Lead Magnet Download, and Direct Contact**.
-

★ Core Deliverables

1. Homepage

- Hero section:
 - *Headline: "Custom Software & Digital Solutions to Grow Your Business"*
 - *Subtext: "Web & App Development, UI/UX Design, and Business Strategy – all tailored to your needs."*
 - *CTA Button: Book a Free Consultation*
- 4 Services Overview (cards):
 - Web Development
 - App Development
 - Digital Marketing
 - AR/VR
 - 3D Modeling
 - U/UX Design
- Why Choose Us (icon + text: Since 2021, Business Health Checkup, End-to-End Solutions)
- Lead Magnet Section: *"Download Software Project Planning Guide"*

- Portfolio Preview (cards/slider)
 - Testimonials (name, photo, quote)
 - Sticky Chat/Calendly CTA
-

2. Service Pages (One per Service)

Each page should include:

- Problem → Solution breakdown
 - Key features
 - Industry use cases
 - Tools/Tech Stack
 - CTA: *Get a Quote*
 -
-

3. Portfolio Page

- Grid of project cards
 - Each card opens into a detailed case study with:
 - Client
 - Problem
 - Solution
 - Result
 - Tools used
-

4. About Page

- Company story (founded 2021)
 - Vision & Mission
 - Awards/Certifications (*e.g., Star of Excellence Award Of 2021*)
 - Optional: Team
-

5. Contact Page

- Contact form (with email integration)
- Calendly embed for bookings
- WhatsApp chat widget

- Optional: Location
-

6. Blog Page

- Blog layout with categories/tags
 - Preview (image + title + excerpt)
 -
-

7. Careers Page

- Role listings with filters (by department/designation)
 - Application form
-

✂ Functional & UX Requirements

- Responsive (mobile-first)
 - Optimized for fast loading
 - Sticky top navigation with CTAs
 - Smooth animations (scroll/hover)
 - SEO-ready structure
 - Email marketing integration (Mailchimp or similar)
 - Analytics (Google Analytics + Meta Pixel)
 - WhatsApp chat widget
-

✂ Branding Guidelines

- Colors:
 - Gold **#D4AF37**
 - Black **#000000**
 - Black (backgrounds & text)
 - Fonts: Inter, Poppins, or Montserrat
 - Tone: Premium, Professional, Innovative
 - Style Reference: **Turing.com**, **InVision**, **CRED**
-

✂ Technical Stack Expectations

- **Frontend:** React.js / Next.js (with TailwindCSS or Styled Components)
- **Backend:** Node.js (Express) / Laravel / Django

- **Database:** MySQL / PostgreSQL / MongoDB
 - **CMS (optional):** Headless CMS (e.g., Strapi, Sanity, or WordPress as headless)
 - **Deployment:** Vercel / Netlify (frontend) + Render / Railway (backend)
-

Submission Requirements

- GitHub repo with frontend + backend
 - Clear commit history
 - README with setup instructions
 - Deployed link mandatory
 - 3–5 min Loom video walkthrough mandatory
-

Time Expectation

- 5–7 days (Need a full production build)
